Guorun Wang
Tongji University, No. 4800 Cao 'an Road, Shanghai, China,
18562577568 wangguorun01@hotmail.com https://caffreyr.github.io/about/

Education

Tonji University, College of Electronics and Information Engineering

Data Science and Big Data Technology
Major GPA: 4.73/5.0 which is equivalent to 92.33 on 100 basis

Research Interests

Multimodal, NLP, 2D&3D vision, Efficiency

Research Experience

• Research assistant in Cognitive and Intelligent Computing Lab, Tongji University, working on Multimodal in image caption, multi-modal classification, and diffusion model with Professor Yaoru Sun and Dr. Jun Yang. (09/2021 ~ now)
• Research assistant in H2lab, University of Washington, working on Parameter-efficient NLP with Dr. Qingqing Cao(Postdoc). (07/2022 ~ 03/2023)
• Research intern in contex.ai with faculties of Imperial College, working on 3d NerFs and understanding with Professor Lucia Specia and Dr. Viktoriia Sharmanska. (08/2022 ~ 09/2022)
• Robustness of human body reconstruction and segmentation method in Tongji University, working with Professor Kuo-yi Lin. (05/2021 ~ 06/2022)

Awards

• First Prize NOIP 2017 (C++) ——Top 5%
• 2022 Second Prize Tongji Scholarship, 2021 Third Prize Tongji Scholarship, 2020 Third Prize Tongji Scholarship
• First Prize The 4th China College Students Mechanical Engineering Innovation and Creativity Competition (2021)

Publication

Paper Entering Publication Schedule:

U2 Net-Plus and background removal based PIFu-HD : Human Body Reconstruction in Complex Background (Int. J. of Internet Manufacturing and Services)
DOI: 10.1504/IJIMS.2022.10050483

Task-oriented Memory-efficient Pruning-Adapter
https://arxiv.org/abs/2303.14704

Accepted Paper :

What are You Posing: A gesture description dataset based on coarse-grained semantics (ICNLP 2023)
• in press

Papers under Review and Manuscripts:

Pixel Difference Convolution for Deepfake Detection

Deep Pixel-wise Textures for Construction Waste Classification(IEEE Transactions on Instrumentation & Measurement)

Using diffusion model to improve RGBD segmentation(*manuscripts*)

Professional Experience

Applying Machine Learning to Engineering and Science - Professional Certificate Program offered by MITxPRO (06/2021 ~ 08/2021)
• Foundational Machine Learning concepts
• Programming and application of Data Science

Assistant of Parallel and Distributed System Architecture Technology offered by Tongji University (09/2021 ~ 01/2022)
• Building a Linux cloud server for CUDA accelerated source code testing
• Assigning an exclusive account to each user according to his/her ID
• Testing homework of BMP image convolution using MPI, Pthread, OpenMP, CUDA

Bug reporter -- For the verification code vulnerability of Tongji Educational Administration System (12/2021 ~ 01/2022)
• Writing crawler software which can use computer vision technology to crack verification code automatically and crawl credit data and consumption data
• Reported to the Network Information Office of Tongji University
• Positive feedback and acknowledgements

Industrial Projects

Project: Intelligent Dance Evaluation and Teaching Mode based on Pose Estimation
Team member   May 2021 - June 2022
Tutor: Kuo-yi Lin
• Have won many awards
• Computer Vision and OpenPose
• Deployed on a large server in Pudong, Shanghai

Project: Driving status recognition
Team leader   May 2021 - June 2022
Tutor: Kuo-yi Lin
• Corporating with Baidu
• Computer Vision and Face recognition
• Deployed on a server in Paddle

Project: Financial statement identification
Team member   January 2022 - June 2022
• Translation of original image to Json file
• Computer Vision

Skills
• Language Ability: Toefl 93,
• Programming Languages: Proficient in Python, C++,

•--Software Tools: Proficient in MySQL, MongoDB, Hbase, Bash and GIS.

•--Deep Learning Framework: Proficient in Tensorflow, Keras, Pytorch.
